Om Sai Ram

It gives us immense pleasure to share our humble endeavour in form of the latest collection of our brand 'Design Indian Kitchen'

We have kept our collection, our designs and our concepts pure and clean as 'The Basil Plant'. We believe in righteous dealing and desire to build goodwill relations with all our Clients.

As per Tradition, the Basil Plant stands for its Auspiciousness, Sacredness and is considered to bring prosperity in our Homes. Its leaves also have medicinal properties which cure many ailments. With every successful completion of a project, we offer you a token of our gratitude in the form of this auspicious basil plant. We request you to accept it wholeheartedly and wish us to spread the divine vibrations where ever we initiate our Work.

Here are some of the benefits of Having basil plant in our residences.

A Tulsi plant in your home

In Hinduism, a Tulsi plant is not just considered a plant, it has a special significance in the scriptures of the religion. Tulsi, as is believed, is Lord Vishnu's consort, hence the conscious and mother of the Universe. --- it is said that keeping this plant in your home can invite good luck and prosperity, but do you know that it can predict your future as well?

Not only this, the presence of Tulsi is known to bring prosperity and happiness in the family.

The plant is also known by the name 'Brinda' and is considered dear to Lord Krishna. Keeping aside the spiritual significance of the plant, undoubtedly the plant is 'The Incomparable One' with its numerous health benefits like a potential adaptogen, antibacterial and anti viral agent, antioxidant, immuno modulator, anti depressant, has anti cancer properties and lots more.

The Value of Wood

Most of us take the Importance of wood in our everyday Life for granted.

But when people admire wood and timber products, they rarely think for a moment of the country of origin of the forest from which the wood is taken.

Nor indeed do they think of the conditions in which the population of that country live or the damage caused to their environment by the destruction of their forests.

Nor do they realise that the accumulated destruction of forests in all countries is contributing in a massive way towards overall global warming leading to a serious decline in biological diversity - the foundation of life.

Wood is one of the earth's most versatile and probably most familiar natural raw material and the important role it plays in our daily lives often goes unnoticed. Each day millions of people around the world derive their livelihoods working with wood. The quality of our lives has been greatly enhanced because of this wonderful resource.

It's myriad uses is staggering. Wood, in its easy to recognize natural state provides us with furniture, building components, musical instruments, sporting equipment, household utensils, etc. In its altered (processed) form its role is not so obvious, yet it is there, under the guise of paper, fabric, glue, alcohol, rubber, food medicine, etc.

Simply more affordable

At Design Indian Kitchen we make sure flexibility is built in.

We want to make buying your dream kitchen as easy as possible.

So we give you the freedom and flexibility to buy your kitchen the way you want. There's three different ways to get started:

Bring your measurements in store for an instant quote

Just bring your kitchen measurements in store and one of our designers will give you a fairly accurate quote for any of our kitchens. It's then up to you if you want to get the ball rolling straight away, or we can doublecheck your measurements with a home visit if you prefer.

Visit our online showroom & select kitchens

At designindiankitchen.com we've got a handy configurator that estimates how much your kitchen will cost. It uses the size of your space and the type of design you want - so feel free to have a play online and look at lots of different options. Then when you're ready, you can book a design appointment in store or online.

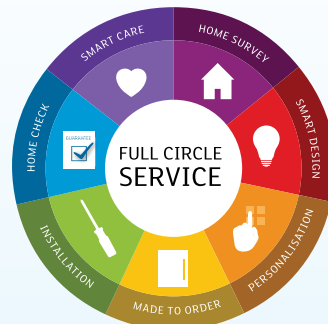

Visit our unit and book a design appointment

Units are still the best way to get a real feel for a kitchen. You can talk about the kind of kitchen you want with one of our designers and wander round the showroom at the same time. And if you like what you see, book an appointment for our designer to visit you at home.

Full Circle Service is as flexible as you want it to be.

Full Circle Service is unique to Design Indian Kitchen. It covers the entire process of buying your dream kitchen, from start to finish. Alternatively, you can use it in a more personalized way, by choosing the services you need, when you need them.

By offering you as much or as little of our Full Circle Service package as you want, Design Indian Kitchen gives you the freedom and flexibility to buy a kitchen at a pace that suits you. Things can move very quickly, or a bit more leisurely, depending on what you feel comfortable with. It's your choice.

Home survey

- We always aim to create your dream kitchen, whether you've got Rs. 75,000 to spend, or Rs. 7,50,000.
- Ask for a home visit from one of our designers, they'll take accurate measurements and get an idea of what you want from your new kitchen.
- Or, if you've already brought us your measurements, we can double-check them if you want us to.
- The planner you first meet will be your personal designer, they will look after your project from start to finish. So you'll always have one point of contact.

Smart design

- Our designers only design kitchens, which makes them kitchen experts. And they're always aware of the latest trends, technologies and design possibilities.
- We use the latest 3D technology to create a computer generated image of how your kitchen will look from every angle.
- And remember, all this can be done at a pace that suits you.

Personalisation

- First of all, we'll agree your kitchen layout, then we can also begin to look at ways of personalising your kitchen. We know you don't want your kitchen to look like everyone else's.
- There are hundreds of ways to make your kitchen really 'yours' – different worktops, innovative appliances, ingenious storage solutions, lighting and tiling.
- The whole point of our personalised service is so your kitchen really suits you and your lifestyle.

Made-to-order

- All Design Indian Kitchen kitchens are made-to-order so you know you're getting something made to your exact requirements.
- We've got our own manufacturing plant - the only one of its kind in the India - and we only begin to make your customised kitchen after your order has been placed.

Installation

- We're operating members of the government endorsed TrustMark scheme, that means our installers are selected, approved and monitored to make sure they're 100% trustworthy.
- Installation starts with a pre- technical survey to make sure we really understand what your installation will involve.
- Design Indian Kitchen's approved installers know our kitchens inside out, so they get the job done quickly and efficiently. And they always tidy up on completion.
- Once your kitchen is installed, you'll receive a 24 month workmanship guarantee.

Home check

- If you choose our installation service, your designer will contact you within 2 days and visit you to check that you're happy with everything. If there is something you're not happy with, your designer will help you get it sorted out straight away.
- You'll then be given a 8 year guarantee for rigid kitchens and a 7 year shutter guarantee for your kitchen and wardrobe for complete peace of mind.

Smart care

- If you want us to, we'll visit your home one year after installation to conduct a smart care check. All you need to do is get in touch to make your appointment.
- This means we'll give your kitchen a proper check-up and make sure it's looking and performing exactly as it should be.
- After that we'll give you a written report and some tips on the ongoing care and maintenance of your kitchen.

Harmony - Painted Kitchens

Painted Kitchens

A simple but stunning contemporary kitchen that demands attention, with its super high gloss finish and premium two-tone edging. The doors are bold, bright and very ontrend, and their neutral tone and clean styling gives you the freedom to mix them with different textures and a versatile palette of colours. Here we've teamed the cabinets with corian worktops to great effect.

Harmony - Painted Kitchens

Painted Kitchens

This Dark veneered design is a real classic. The glazed wall units provide a stylish addition, while the stainless steel handles and Mississippi corian worktop provide elegance and contrast. A modern take it may be, but this kitchen looks just as good in a traditional setting.

Celebration - Spanish Edition

Spanish Edition

Combining traditional dark grain effect shutters with an industrial mid-grey palette, the Winchester Grey is the perfect intersection between classic and contemporary. The ceaserstone worktop nods to the spacious country kitchen, whereas the franke stainless steel sink represents a modern take on a traditional aesthetic that wouldn't be out of place in a city apartment. Whether you're looking for a space to entertain, or simply a space to cook in, look no further than the sleek, stylish Winchester Grey.

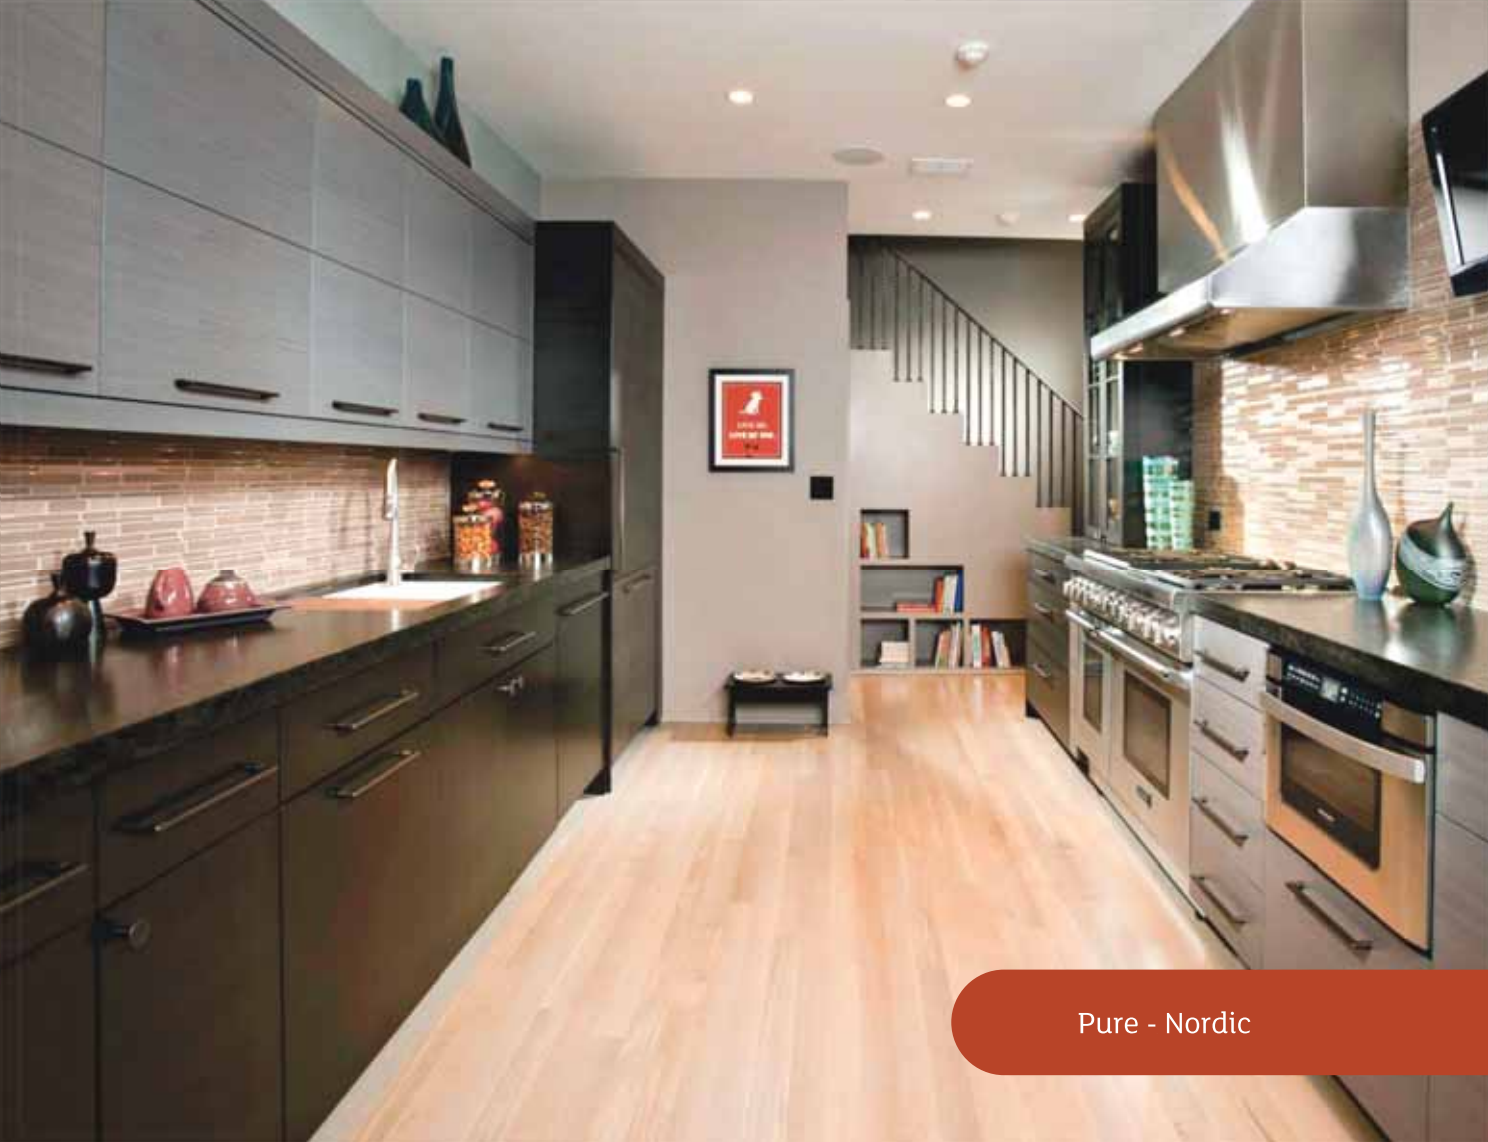

Celebration - Spanish Edition

Pure - Nordic

Nordic

There's plenty of clever design packed into this kitchen. And classic dark cabinets and drawers keep it looking slick and modern, with a totally smooth appearance. A subtle silver trim on the edges of cabinets adds contrast between the doors and drawers. You can have deep-pan drawers and a pull-out larder, or just create a simple wall design with repeating units. The glossy veneered finish is ideal for those looking for a contemporary feel.

Pure - Nordic

Nordic

This is a simple but attractive design. The glossy finish of the units can work perfectly alongside contrasting corian worktops. And try something like stainless steel sinks and taps matched up with straight, aluminium lip handles as an easy and effective way to continue the minimal look. We've added in some of our new smoked glass Vista units and red toned cabinets to the wall cabinets to add a bit of variety.

CELEBRATING GOODNESS - A TIMELINE

by SB

It takes Heart to spread Goodness around, as negativity is rampantly evident around us. At The Design Indian Kitchen Company, its our objective to spread ' Peace & Harmony ' through our constructive Designs and affordable Works. We want to spread Goodness by spreading smiles through our Products & Projects. All our Products should deliver a sense of satisfaction & utmost trust to You. As that alone brings in worth to the Brand.

The Design Indian Kitchen Brand was established in 2007, we were basically a trading partner for leading accessory brand. Then turned into Manufacturing after multiple tie ups with Partners, this lead to our diversification in multiple products. On an Average we have more than 1600+ successful projects till date and Counting. Grace !

Gracious Achievements - We as a Team Worked Passionately and Expanded our Areas, which led us to partner with more than 150+ Dealers across North India. Our Core Values of Ethical & Truthful Business Terms and Beliefs have been been Blessed.

From a Team of 3 Members, we have now direct and Non-Direct Channel Partners working with us. The Designers at Helm give us an edge by their creative and dexterous skills. Our Installation Division which now has dedicated 15 Teams, give us extra wind to float.

We Offer Our Humble Gratitude to All Our Guests, Visitors, Our Trade Partners, Our Well Wishers and To the Divine Architect without whom the Company would not have existed.

TIPS ON HOW TO MEASURE YOUR KITCHEN

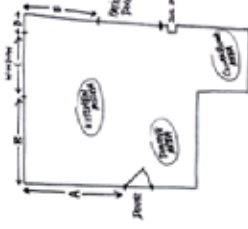

1. To begin sketch out your room as a simple box, detailing all areas that will contain kitchen furniture - be sure this includes any major structural features and protrusions.

2. Make a note of any openings in your room - knowing where doors, windows and archways are will help us get your design just right. Tell us where any soil pipes, boilers and electrical meters are in case they impact on the space where kitchen furniture will be going.

3. Before measuring, label all the critical areas on your plan. In this example it's areas A, B, C, D and E, including any window or door measurements. Only measurements around the areas that will have furniture in are needed. Alongside your plan write the same letters as a key, then simply grab your tape measure and... II in the relevant measurements i.e. A=, B= etc.

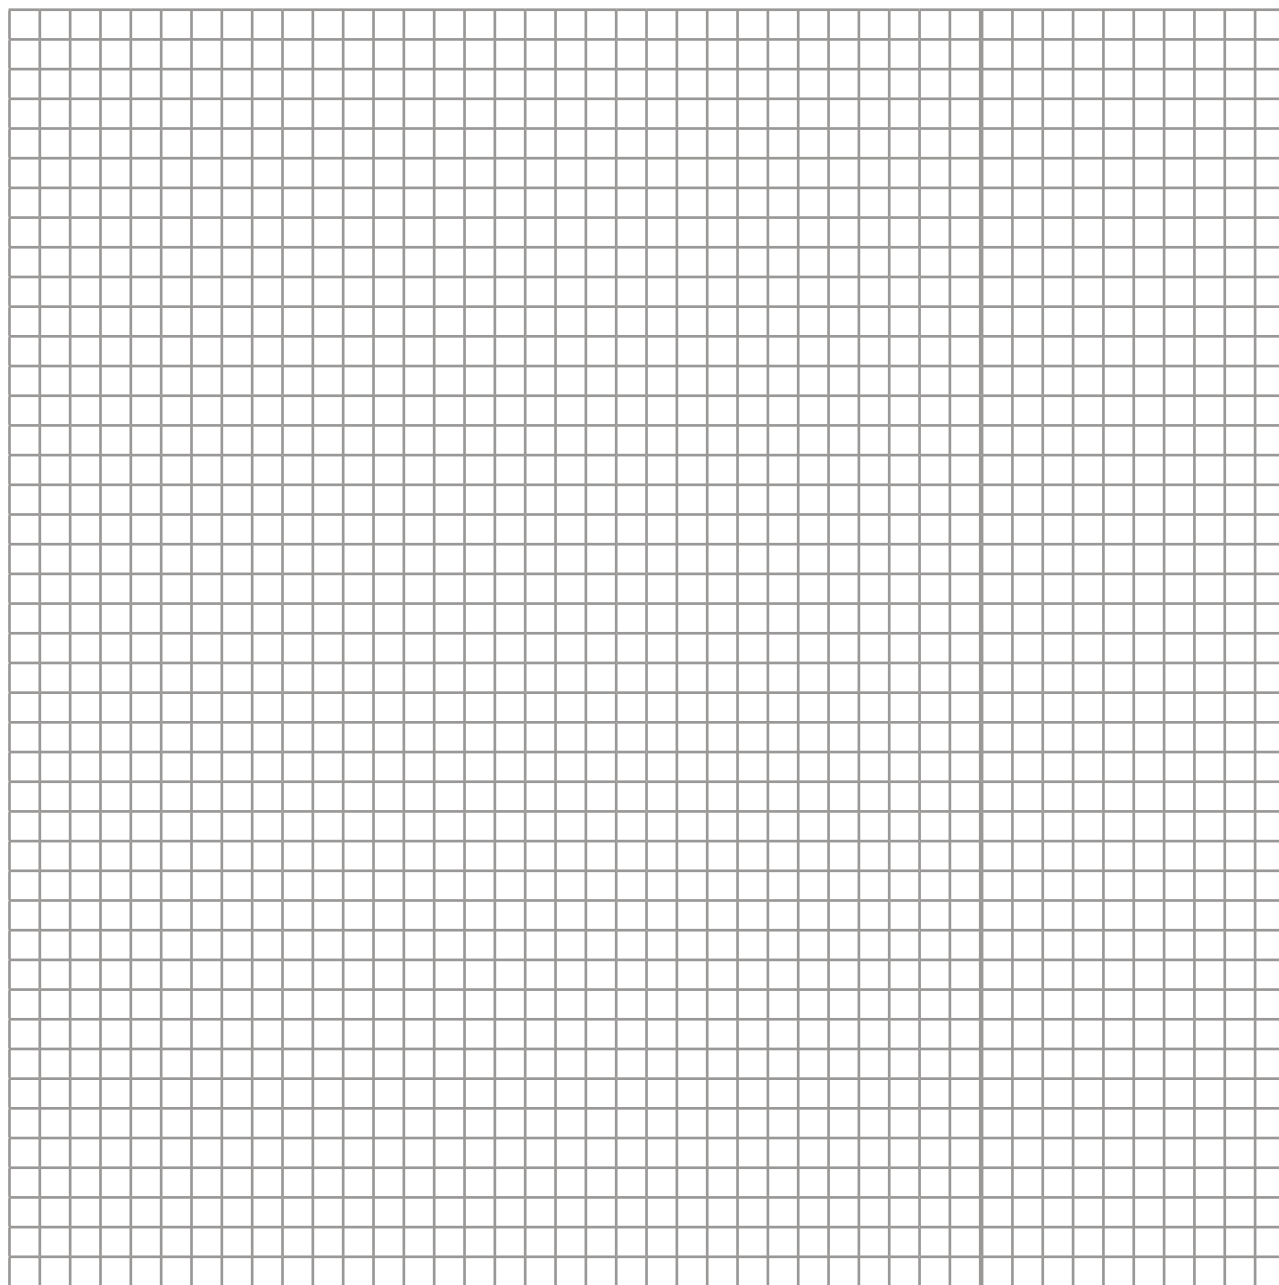

4. Most people already have an idea of the kind of kitchen shape they want. If you're one of them be sure to sketch out your rough design. Also, make a note of all the key elements such as any appliances and the position of your sink.

Remember this is just to get us started. We'll do our own, more thorough measuring at a later stage, if required, so don't panic if yours isn't millimetre perfect.

Whether using millimetres and centimetres or feet and inches be consistent and use the same throughout.
